Portfolio

WORK EXPERIENCE

Software Engineer – Full Stack & AI | Project-Based

May - August 2026

Government Agency - Disaster Risk Management Information System

- Developed and implemented full-stack web features across the frontend, API layer, backend, and database using C#, ASP.NET Core, React.js, RESTful APIs, MySQL, and Microsoft Azure, with Git/GitHub for source control and collaborative development.
- Translated stakeholder requirements into functional features through requirements analysis, Waterfall SDLC practices, API integration, database development, automated testing, deployment, authentication, and technical documentation.
- Investigated and resolved application issues through testing, debugging, log analysis, root-cause investigation, and AI-assisted troubleshooting, improving system reliability, functionality, and delivery efficiency.

Finance and Data Analytics Intern

March - May 2026

I-Merch Media Incorporated - Mandaluyong City, Metro Manila

- Managed and validated financial data for 32 clients, preparing Excel reports and supporting the consolidation of Q1 2026 financial reports involving approximately ₱300M in assets.
- Used QuickBooks and Microsoft Excel, including XLOOKUP, VLOOKUP, LET, PivotTables, and data validation, to organize, reconcile, and analyze financial records.
- Investigated data discrepancies, maintained accurate records, and prepared reports to support financial analysis, reporting, and data-driven decision-making.

PROJECTS

PoultryConnect – Farm Management & Marketplace Platform

A web-based poultry farm management system that streamlines farm operations and communication between stakeholders.

- Built and shipped full-stack marketplace and farm-management features integrating frontend interfaces, RESTful APIs, relational databases, authentication, order-processing workflows, and Git/GitHub using Agile development practices.
- Applied AI-assisted development, prompt engineering, API integration, and workflow automation to accelerate feature development, troubleshoot issues, improve processes, and enhance application functionality.
- Performed requirements analysis, testing, debugging, deployment, database management, documentation, and system improvements, delivering reliable features for product management, customer communication, orders, and feedback.

DigiSPES – Employment Management Information System

A web-based system that streamlines the application, management, data analysis, and automation of the Special Program for Employment of Students (SPES).

- Developed and shipped full-stack web features across the frontend, API layer, and database using Python, HTML/CSS/JavaScript, SQL, and Git/GitHub, following Agile SDLC practices, requirements gathering, process mapping, and workflow automation with the government officials in Baybay, Laguna.
- Integrated AI-assisted development and prompt engineering into the development workflow, using AI tools such as Gemini, GitHub Copilot, and OpenAI for feature implementation, code generation, debugging, testing, troubleshooting, and improving development efficiency.
- Implemented RESTful APIs, database-driven functionality, authentication, testing, deployment, and technical documentation, supporting end-to-end delivery and maintainable system handover.

EDUCATION

Bachelor of Science in Information Technology

September 2022 - June 2026

Laguna State Polytechnic University, Magna Cum Laude, DOST-SEI Recipient, Best in Capstone, Academic Proficiency, SSC Leadership Awardee

TECHNICAL SKILLS

Full-Stack Development

- C#, ASP.NET Core, .NET, Python, PHP, JavaScript, React.js, HTML, CSS, RESTful APIs, Kotlin

AI & Automation

- AI-Assisted Development, Prompt Engineering, AI Application Integration, LLM/AI Tools, Workflow Automation, API Integration, ChatGPT, GitHub Copilot, Gemini, Claude, Perplexity, DeepSeek

Software Engineering

- SDLC, Agile, Scrum, Waterfall, Requirements Gathering, System Analysis, Software Testing, Debugging, Root-Cause Analysis, Authentication & Authorization, API/System Integration, Technical Documentation, Process Mapping, Workflow Automation

Database & Data

- MySQL, SQL Server, PostgreSQL, Oracle, Azure Cosmos DB, SQL, Relational Database Design, Database Management, Data Validation & Transformation, Database Migration

Cloud, Deployment & DevOps

- Microsoft Azure, Railway, Render, Vercel, Aiven, Firebase, Docker, Git, GitHub, Application Deployment, Cloud Deployment, Database Deployment, CI/CD Concepts

Tools & Productivity

- Visual Studio Code, PyCharm, Android Studio, Antigravity, XAMPP, Docker, Microsoft Excel, Google Sheets, Microsoft Office, Google Workspace,

CERTIFICATIONS

- IT Specialist – Data Analytics — Certiport
- Advanced Level of Cloud Computing — DICT Philippines
- Advanced Level of Software Engineering — DICT Philippines
- Programming for Beginners Using Python — DICT Philippines
- Basic JavaScript for Web Development — DICT Philippines
- SQL (Basic) — HackerRank
- Scrum Fundamentals Certified (SFC) — Scrum.org
- Six Sigma Yellow Belt — 6sigmastudy
- Using HTML and CSS to Design a Website — DICT Philippines
- SQL Injection Attacks — EC-Council
- Information Security — Saylor Academy
- Data Privacy – Good Governance — DICT Philippines
