Portfolio

WORK EXPERIENCE

Finance and Data Analytics Intern

March - May 2026

I-Merch Media Incorporated - Mandaluyong City, Metro Manila

- Automated Microsoft Excel reports and developed interactive dashboards for 32 client companies using advanced Excel functions, PivotTables, macros, formulas, and automation techniques.
- Prepared, consolidated, and analyzed financial reports for Q1 2026 involving over ₱300 million in assets and transactions.
- Collaborated with finance and operations teams to identify reporting requirements, and deliver actionable insights.

Software Developer

May 2026 - Present

Government Agency

- Developed a web-based Disaster Risk Management Information System using C#, React.js, Vite, Bootstrap, and MySQL.
- Designed and implemented database structures, backend APIs, frontend UI components, authentication, and core system modules.
- Performed system testing, debugging, and optimization for secure authentication, ensuring security, and user experience.

PROJECTS

Yelo-House

It is an ice cube manufacturing and distribution business serving customers in Paete, Laguna.

- Developed interactive sales dashboards using Microsoft Excel and Tableau to deliver business insights and sales forecasts, enabling Yelo-House to monitor performance and optimize its average monthly profit of approximately ₱40,000.
- Analyzed sales data to identify trends, monitor performance daily, and support data-driven business decisions.

DigiSPES

A web-based system that streamlines the application and management, data analysis, and automation for the Special Program for Employment of Students (SPES).

- Developed core system features using Python, MySQL, HTML, CSS, and JavaScript.
- Collaborated in Agile development by gathering and refining business requirements with PESO (Public Employment Service Office) stakeholders across Baybay Laguna areas municipalities, translating operational needs into system features.

PoultryConnect

A web-based poultry farm management system that streamlines flock monitoring, inventory management, health records, and communication between farmers, veterinarians, and feed suppliers.

- Developed Poultry Connect, a web-based poultry farm management system using Python, MySQL, HTML, CSS, and JavaScript.
- Applied Agile development to implement business requirements that addressed the needs of poultry farmers in Pangil, Laguna.

GabayKape

An informational application that provides coffee farmers with weather forecasts, educational resources, and an AI-powered chatbot for coffee farming assistance.

- Developed GabayKape, an informational mobile application using Kotlin, XML, and MySQL.
- Applied Agile development to implement business requirements for the Municipal Agriculture Office (MAO) of Sta. Maria, Laguna.
